E Source Forum 2021: Spotlight on overcoming electrification roadblocks with emerging opportunities

With E Source Forum 2021 just one week away, we're pleased to bring you our final track spotlight. We can't wait for you to join us next week and hope you have a wonderful event whether you're coming in person or logging on from home.

Today, last but certainly not least, the spotlight is on the "Overcoming electrification roadblocks with emerging opportunities" track. This track will focus on what's to come with electrification opportunities, electric vehicle adoption and charging infrastructure, and the goal of a carbon-free future.

Hot session alert!

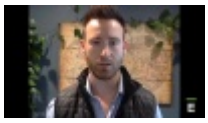

A carbon-free future: Assessing utilities' plans for meeting emissions goals
Friday, October 1, 9:00 a.m. MT

Net-zero carbon and carbon-free goals are becoming increasingly common for utilities. How much more confident are they now about hitting their goals since the first carbon-free goal in the US utility sector was announced at the end of 2018? How much closer are we as an industry to understanding how we'll get to zero emissions than we were last year? What's changed? Join this session to hear progress updates and visions of the future from utilities with carbon-free goals.
