## Let machine learning transform the way you manage gas-distribution resources

Data science company E Source has helped dozens of utilities transform the way they manage gas-distribution resources. The E Source GridInform (PDF) gas module leverages data science and artificial intelligence (AI) to predict gas leak repairs before they're needed—allowing your team to optimize staffing and resource planning.

Learn more about our grid and asset optimization solutions and how our data science team can help you manage gas-distribution resources.
