## [E Source strengthens consulting business unit with appointment of Jeremy Klingel as president of Solution Services](#)

E Source, a utilities-focused consulting, research, and data science company, has announced the appointment of [Jeremy Klingel](#) as president of Solution Services. Klingel arrives at E Source with more than 20 years of experience in the energy and utility industry, building and scaling consulting, engineering, and technology-led practices.

Klingel previously served as senior partner with West Monroe's Energy & Utility practice and founded the firm's Clean Energy & Infrastructure Investment Advisory offering. Before West Monroe, Klingel was head of US Energy and Utility Advisory at PA Consulting and held multiple executive positions at Black & Veatch, leading global business lines in management consulting, engineering, and construction.

Klingel takes over from industry veteran [Mike Bassignani](#), who will transition to a strategic advisory role. This will ensure a smooth leadership transition while supporting key clients and planning efforts.

"Jeremy's industry knowledge, business acumen, and leadership are a great addition to our leadership team as we continue to grow our capabilities organically and through acquisition. I am delighted to welcome him to E Source and look forward to partnering with him to continue to deliver value to our client base," said E Source CEO [Dave Perotti](#). "I also want to thank Mike for his exceptional leadership in helping establish E Source's consulting business and congratulate him on a fantastic career. Mike has a wealth of industry knowledge and experience, and we're lucky to continue working with him in his strategic advisory role."

Solution Services, E Source's consulting unit, serves some of the largest investor-owned utilities in the US and Canada, providing advisory on customer engagement, smart infrastructure, utility operations,

and enterprise performance management. E Source also supports municipal clients of all sizes, with experience advising public utilities in cities like Los Angeles, San Antonio, and New York. In his new role, Klingel will focus on growing the unit and adding new capabilities that deliver tangible results across E Source's client base in the utility industry.

"E Source's combination of in-depth domain knowledge and data-enabled solutions allows us to help clients address some of the industry's most compelling and unstructured problems," said Klingel. "I'm excited to work with such a stellar team of highly regarded experts to build on an incredible utility-centric brand that offers clients a true alternative to the Big 4. E Source's pedigree in infrastructure, emerging technologies, and customer experience has the potential to provide significant value to utilities seeking to proactively address decarbonization, electrification, and energy equity."

E Source's transformation as a utilities-focused solutions provider furthers the company's goal of helping clients address their complex and interconnected priorities in environmental responsibility, grid reliability, customer equity, and financial stability.

"Whether it's the clean energy transition or increased need for resiliency, our goal is to create focused, effective, and scalable solutions that equip utilities to make the best decisions for their customers, stakeholders, and communities they serve," added Klingel.
